## Welcome to EQRS Reports

[Patient Events Report](#)  
This report identifies all patient events in EQRS.

[Patient Roster Report](#)  
The Patient Roster Report allows users to run and print a report which includes all patients present at the selected facility(ies) within the user scope as of a specific date.

# Running a Patient Roster Report

Please click on the [Patient Roster Report](#)

- Begin to fill in the criteria selection
- Fill in Patient Roster as of the end of the previous month
- Next under Network Selection, click Network 4
- Under Search Facility Name, Facility CCN or Dialysis Organization begin typing your CCN or facility name, when you see your facility below that box, click on it
- Under Sort Order: select Patient Name
- Export As: Excel
- Click Generate Report (Please note the page may just refresh and it looks as if nothing was done)
- Click on My Reports on the left hand side of the screen and if it went through you will see that the report is pending
- Wait a minute or two and then click on My Reports again and see if the report is listed as Completed
- Once completed, you should be able to click on the report to download it

# Patient Roster Report

## Patient Roster Report

### Criteria Selection

The Patient Roster Report will report a list of the patients admitted to the selected facility(ies), as of the date specified.

# What do I do next?

- Once your report is complete, click on the Excel file to download it.
- Once it is downloaded click to save the file and name it whatever file name you prefer.
- This file is already in Alphabetical order by the patients' last names.
- Hopefully you can compare this to a list from your EMR to confirm that this list is correct.

# Running Events Report for Admissions

Please click on the **Patient Events Report** (you will be running this report twice, once for admissions and again for discharges)- *[unless you are savvy with Excel, then you can combine the two options as I explain in later slides and manipulate to your heart's content]*

- Begin to fill in the criteria selection
- Your date range can be whatever you choose. You can start from January or you can run one for each month to capture your admissions and discharges for the previous month. When working on the annual CMS 2744 you should run a report for the entire year from January 1 to December 31 (01/01/202\_ - 12/31/202\_)
- Next under Network Selection, click Network 4
- Under Search Facility Name, Facility CCN or Dialysis Organization begin typing your CCN or facility name, when you see your facility below that box, click on it
- Under Report Parameters: **select every option under Admit Reasons but Dialysis in support of Transplant and Transplant**
- Select to export to Excel
- Click Generate Report (Please note the page may just refresh and it looks as if nothing has happened)
- Click on My Reports on the left hand side of the screen and if it went through you will see that the report is pending
- Wait a minute or two and then click on My Reports again and see if the report is listed as Completed
- Once completed, you should be able to click on the report to download it

# What do I do next?

- Once your report is complete, click on the Excel file to download it.
- Once it is downloaded you may see the following appear at the top of the screen. You must click **Enable Editing** before proceeding...

- Next save the file and name it whatever file name you prefer
- With the file open, you will need to delete the first three rows of information
- Next on the informational ribbon at the top of the screen, click on the data tab and then click the funnel-shaped icon marked filter

- This will allow you to filter your data by a row header (the first row that has titles such as “EQRS ID, Last Name, etc)

# Additional Steps...

- If you utilize an internal tracking sheet by month then you may want to filter by “Admit Date”
  - Find the column named, “Admit Date”, click the small upside down triangle on the right of that box and select Sort Oldest to Newest. This will put this column in date order.
  - Now you have a list of patients admitted in date order and know how each patient was admitted to your facility
- If you utilize an internal tracking sheet by admission type, then you may want to filter by “Admit Reason”
  - Find the column named, “Admit Reason” click the small upside down triangle on the right of that box and select Sort A-Z. This will alphabetize the items in that column.
  - Now you have a list of patients by admission type and know how each patient was admitted to your facility.

- This will allow you to filter your data by a row header (the first row that has titles such as “EQRS ID, Last Name, etc)

# Additional Steps...

- If you utilize an internal tracking sheet by month then you may want to filter by “Discharge Date”
  - Find the column named, “Discharge Date”, click the small upside down triangle on the right of that box and select Sort Oldest to Newest. This will put this column in date order.
  - Now you have a list of patients in date order and know how each patient was discharge from your facility.
- If you utilize an internal tracking sheet by admission type, then you may want to filter by “Discharge Reason”
  - Find the column named, “Discharge Reason” click the small upside down triangle on the right of that box and select Sort A-Z. This will alphabetize the items in that column.
  - Now you have a list of patients by discharge reason and know how each patient was discharge from your facility.

# Example of Patient Events Report

NETWORK 4

## Patient Events Report

As of 11/01/2021-11/30/2021
